DEPARTMENT OF SOCIOLOGY

STUDENT HANDBOOK: MSc IN SOCIOLOGY 2017-2018
A note about how to use this handbook

This handbook provides you with all the information you need to know for studying on the MSc in Sociology.

Please note that your degree is formally governed by the Examination Decrees and Regulations (the Exam Regs). This is published in September each year, and can be found online. The MSc in Sociology handbook contains informal descriptions and interpretations of some of the most relevant rules but any formal question has to be settled primarily by reference to the Examination Decrees and Regulations.

The Examination Regulations relating to this course are available at http://www.admin.ox.ac.uk/examregs/. If there is a conflict between information in this handbook and the Examination Regulations then you should follow the Examination Regulations. If you have any concerns please contact the Graduate Studies Administrator at graduate-studies@sociology.ox.ac.uk.

The information in this handbook is accurate as at 6 September 2017. However, it may be necessary for changes to be made in certain circumstances. If such changes are made the department will publish a new version of this handbook together with a list of the changes and students will be informed.

This handbook applies to students starting the Master of Science in Sociology in Michaelmas Term 2017. The information in this handbook may be different for students starting in other years.

Other key sources of information for students on the 2017-18 MSc in Sociology include:

- The 2017-18 Sociology Student WebLearn site – accessible by clicking though from the link on the top of the front page of the Department's web page (http://www.sociology.ox.ac.uk/). (WebLearn is Oxford’s Virtual Learning Environment, where the Department and many courses have pages with further information, course assignments, etc.)
- The Exam Conventions, which will be made available on the above WebLearn site
- The University's website for students: http://www.ox.ac.uk/students
- The handbooks provided by Oxford colleges
Welcome from the Department

Dear incoming Oxford Sociology MSc students,

Welcome to the University of Oxford and to the Department of Sociology. We are delighted you have chosen to study and research with us. We hope that you will have an enjoyable and productive time here.

This handbook provides a guide to your degree course and to life as a graduate student in the Department of Sociology. Please read it carefully! And in future if you have a question or need to refresh your memory please turn back to this document as your first port of call. It is also available online via the Departmental web page (https://www.sociology.ox.ac.uk/materials/documents/handbooks/DPhil_Student_Handbook.pdf).

If you cannot find the answer to your question, then please do not hesitate to contact our wonderful Graduate Studies Administrator, Kristiana Dahl, either by email (graduate-studies@sociology.ox.ac.uk), phone (01865 286183), or by going to her office, no. 326.

Professor Stephen Fisher is the Director of Graduate Studies (DGS). The main purpose of this position is to chair the Sociology Graduate Studies Committee (GSC) which is responsible for delivering all the degree programmes for the department. When it comes to administration, the Taught Course Director (TCD), Professor Federico Varese, is primarily responsible for overseeing the two Masters programmes and the DGS focuses more on the doctoral programme. But Kristiana does the lion’s share of the work on everything to do with graduate studies in the department.

Issues that several students collectively want to discuss are often brought to what is known as the Graduate Joint Consultative Committee (GJCC). The name is one of the many examples of strange terminology used in Oxford. Essentially it is a termly committee meeting where faculty and students discuss whatever issues students want to raise. Please see page 40 for further details, and do let your course representative know if there’s anything you are concerned about.

If there is some question or issue that you personally want to raise at a senior level please do not hesitate to get in touch. Usually the best way is to arrange a meeting by email with the DGS stephen.fisher@sociology.ox.ac.uk, or with the TCD Federico.varese@sociology.ox.ac.uk.

There are, of course, other aspects of student life in Oxford that this handbook does not cover, including information about the Social Sciences Division of which the Department of Sociology is a part (https://www.socsci.ox.ac.uk/), the Social Studies Library (http://www.bodleian.ox.ac.uk/ssl), the wider university (http://www.ox.ac.uk/), your college, student organisations, etc. Oxford provides many opportunities which we hope you will be able to take some advantage of as well as engaging wholeheartedly in study and research for your degree.

We look forward to meeting you all in person.

Stephen Fisher  Federico Varese  Kristiana Dahl
Director of Graduate Studies  Taught Course Director  Graduate Studies Administrator

MSc at a glance

Overview

The aim of the course is to prepare students for doctoral work in Sociology and for research careers in government and in the private sector. To achieve this, it aims to give students high quality graduate level research training in sociology. This includes:

- Knowledge of the key theoretical approaches.
- An understanding of their application to substantive problems.
- Skills in the use of major research techniques.

By the end of the course students should be able to understand, and to evaluate critically, research monographs and papers at the forefront of academic development within sociology, enabling them to apply these ideas and techniques to their own research work. The emphasis is not only on the findings of sociological research but more importantly on the ways in which these findings were reached, the formulation of the research questions, the research methods used, and the interpretation of the research results.

Students who successfully complete the course should thus have acquired a solid basis for further, independent research and should have the relevant research training necessary for a doctoral degree. It is intended that students who wish to work towards a doctoral degree will, through the MSc, have acquired a thorough knowledge of the discipline and an understanding of, and competence in the application of, the principal research techniques likely to be employed in their doctoral research. In addition the course enables students, through their optional papers, to acquire a more detailed knowledge of the substantive literature in the field of the proposed doctoral research, and, through their thesis, to undertake preparatory work, theoretical and methodological, towards the doctoral dissertation.

It is also intended that students who have completed the course should have developed a solid basis for research work of other kinds, e.g. in government or private administration, in market research, and in international agencies.

The course will be assessed on the following elements:

- A compulsory core paper, Sociological Analysis, for which students sit a three-hour examination at the end of Trinity Term. This paper is described on page 6.
- A compulsory Research Methods course, for which students are examined on a mixture of a formal examination and take-home assignments. The detailed requirements for the Methods course are described on page 7.
- Two optional papers, for which students either sit an examination at the end of Trinity Term, or complete appropriate coursework if there is a practical component. Description of options courses begin on page 9. Students should note that the options available may vary each year and there may be timetable restraints on the choice of options that may be combined.
- A 10,000-word MSc thesis comprising original sociological research. The thesis must be the student’s own work; and analyse a sociological problem specified jointly by Supervisor and student.

The components of the course are weighted as follows:

<table>
<thead>
<tr>
<th>Component</th>
<th>Weight</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sociological Analysis exam</td>
<td>25%</td>

**Term Dates**

Oxford term dates for the 2017-18 academic year:

- Michaelmas Term: 1 October – 9 December 2017
- Hilary Term: 7 January – 17 March 2018
- Trinity Term: 15 April – 23 June 2018
Required Course Work

Class essays, seminar presentations and other assignments form the basis for much of the student’s learning and progress throughout the course as well as being the main way in which we can offer flexibility in meeting individual students’ special interests. This work is compulsory; and termly Supervisor reports on individual progress are required by the student’s college and discussed there as well as at the meetings of the Graduate Studies Committee.

Negative reports or non-attendance at tutorials or classes are taken seriously by the colleges and the Graduate Studies Committee, but do not form part of the formal assessment for the degree.

All assessed coursework is retained in an anonymised form by the department for one year. Retained work is kept for inspection by course providers and external teaching quality inspectors. Samples of non-assessed coursework will also be retained.

All summative coursework will be run through plagiarism detection software called ‘Turnitin’. For more information about regulation regarding Plagiarism please see page 30.

Course Descriptions

CORE PAPERS

Sociological Analysis

Course provider: Dr Michael Biggs

Aims:

This course develops intellectual skills in explaining social phenomena: identifying puzzles, developing theoretical explanations, and testing them empirically.

Topics covered by this course include:

- incentives
- values
- integration
- networks
- diffusion
- evolution

Content and structure:

Each week a lecture introduces one type of explanation, while a seminar that discusses empirical research on a related topic. The topic illustrates this type of explanation in practice, revealing its strengths and weaknesses. The lectures and seminars are complementary but distinct; the lecture will not cover the research discussed in the seminar.

Learning Outcomes:

On completing the course, students will understand the main theoretical tools used to explain social phenomena. They will also be familiar with current debates in various substantive areas of sociology.

Teaching arrangement:

One lecture and one one-hour seminar per week in Michaelmas Term.

Requirements:

- Eight short essays (1500 words each) on the seminar readings; questions will be specified in advance.
- One long essay (3000 words) on a more general question.

Course Assessment:

One 3-hour unseen examination in Trinity Term.
Key references:

Research Methods

Qualitative Methods

Course Provider: Prof Federico Varese

Aims:

To introduce students to the basic issues in the collection of qualitative data.

Topics covered by this course include:

Students will gain practical experience in study design, the application of the major research methods and the analysis of qualitative data. By the end of this course, participants should be able to: appreciate the importance of qualitative methods in sociological research; decide when a research topic requires qualitative research methods and select the most appropriate qualitative format to address the research question; begin to develop skills required to conduct interviews, facilitate focus groups and undertake ethnographic research; begin to understand how to analyse qualitative data; start to understand how to employ qualitative methods alongside other methods in sociological research; appreciate the ethical dilemmas of qualitative research.

Content and Structure:

A course on qualitative methods taught by Prof Federico Varese (8 classes in Michaelmas Term). Carl Drott will act as TA for the class. The course is intended to give an introduction to qualitative research methods.

Learning Outcomes:

By the end of this course, students should:

- have practical experience in conducting and analysing qualitative data;
- understand the ethical dilemmas of qualitative research.

Teaching Arrangements:

Eight lectures/classes on qualitative methods in Michaelmas Term.

Course Assessment:

Students will be asked to collect qualitative data, develop a code book and write a short research proposal. In addition, they will write two short Reading Responses during the term.

Key Texts:

Statistical Methods

Course Providers: Prof David Kirk (Practical) and Prof Elias Dinas and Prof Robin Harding (Lectures)

Aims:

The lectures aim to develop the foundations of statistical thinking and to introduce the most important statistical models used in social science research. The practical classes aim to give students the skills to undertake quantitative data analysis using Stata.

Content and Structure:

This course is taught through an integrated series of lectures, given by Prof James Tilley, and hands-on classes, led by Prof David Kirk. The course is vertically structured: for the
most part, later lectures assume knowledge of the foundational material covered earlier in the course. Topics covered include ideas of sampling and probability models, basic methods for inference about a population from a sample, and the use and interpretation of some common types of statistical models, including linear regression and logistic regression.

**Learning Outcomes:**

On successfully completing this course, students should:

- understand the basic principles of statistical thinking;
- be familiar with the most commonly used statistical models;
- be able to implement standard statistical procedures (multivariate analysis as well as descriptive statistics) using Stata.

**Teaching Arrangement:**

Eight lectures plus eight hands-on classes in Michaelmas Term.

**Course Assessment:**

Students will be given three take-home assignments, which will involve analysing data and writing up the results in a formal manner. The first two assignments will be formative: group-work will be allowed, and marks will be given during Michaelmas Term. The final take-home assignment will be summative; students must work on this paper on their own, and the mark will form half of the final grade. The other half will be made up by a two hour in-class test.

**Key Texts:**

---

**Research Design**

**Course Provider:** Prof Colin Mills

**Aims:**

To introduce students to a wide range of research strategies, and the basic principles in designing social research.

**Topics covered by this course include:**

This course will explore the relationship between the nature of the sociological question being asked and the type of research design needed to answer the particular question. Research designs covered include:

- The logic of experiments;
- Cross-sectional designs;
- Panel designs;
- Comparative designs.

**Learning Outcomes:**

By the end of this course, students should:

- appreciate the strength and limits of different research strategies,
- understand how technical research design considerations should be linked to substantive sociological concerns.

**Teaching Arrangement:**

Eight lectures in Hilary Term led by Prof Colin Mills.

**Course Assessment:**

Students will be required to submit one essay of up to 2,500 words evaluating a published piece of research.

**Key Texts:**

OPTIONS PAPERS

An Option Circus will be held in Week 5, at which Course Providers will describe the courses in detail and be available to answer any questions student may have. Students will then have until the end of Week 6 to select their options. The Graduate Studies Administrator will then send out the schedule as soon as possible after all choices have been made. Three students must choose to take a course for credit for the course to run.

Causality: Methods of Causal Inference in the Social Sciences

Course Provider: Prof Richard Breen

Aims:
The course introduces students to the “potential outcomes” or “counterfactual” model of causality and covers contemporary approaches to identifying and estimating causal relationships using observational data from the social sciences.

Topics covered by this course include:
Topics covered in the class include the potential outcomes model of causality, randomized control trials, matching, propensity score analysis, inverse probability treatment weighting, robustness and sensitivity tests, natural experiments and instrumental variables, control functions, regression discontinuity designs, fixed effects, and difference in difference models.

Content and Structure:
The course focuses on the identification of causal effects, the assumptions on which causal claims rest, and the estimation of causal relationship using statistical models. Basic knowledge of probability and of statistical methods such as OLS regression and logit and probit models is a pre-requisite. There are no practical classes in this course but students will be required to estimate models (in Stata or, preferably, R) and interpret the results.

Learning Outcomes:
On successfully completing this course, students should have an understanding of the central role of causality in the social sciences and they should be able to cast a critical eye on the causal claims that social scientists make. Students should also have acquired a thorough knowledge of the potential outcomes approach to causality, the central role of assumptions in identifying causal effects, and they should be able to estimate a wide range of models for causal inference.

Teaching Arrangements:
Weekly two-hour lectures.

Course Assessment:
Weekly problem sets. These include both theoretical and applied problems.

Key texts:
**Intermediate Quantitative Methods**

**Course Providers:** Prof John Ermisch, Dr Per Engzell, Dr Lucie Kalousova

**Aims:**

The application of standard statistical models to social science data and their interpretation.

**Topics covered by this course include:**

The precise topics covered will vary from year to year depending on the expertise and interests of the staff giving the lectures. In 2017/2018, we will cover: the treatment effect approach, linear regression, instrumental variable estimation, binary, ordinal and multinomial models, and models for multilevel/panel data.

**Content and structure:**

This course follows on from Statistical Methods in Michaelmas Term with the aim of developing a number of more advanced techniques that are particularly relevant to sociologists. It is primarily an "applied" course and emphasizes the application of standard statistical models to typical social science data. Most emphasis is placed on the correct and useful interpretation of parameter estimates rather than on the derivation of the models themselves. The statistical software used in the practical classes is Stata.

**Learning Outcomes:**

On successfully completing this course, students should have an appreciation of the advantages and pitfalls of different methods and experience of the practical use of the methods taught. To gain any benefit from this course, it is necessary to have demonstrated mastery of the material taught in the Statistical Methods course in Michaelmas Term. A poor or even average performance in that course should suggest to you that you are unprepared for this course.

**Teaching Arrangement:**

Eight two-hour lectures (weeks 1–8) and four practical classes (weeks 5–8) in which students are introduced to and gain hands-on experience with software for estimating and testing the statistical models outlined in the lectures.

**Course Assessment:**

The course is assessed by a take home exam consisting of three research questions/problems. The candidates will analyze data using some of the methods covered and write a short report on two of the three questions. The exam will be made available at noon Monday 1st week of Trinity Term and the deadline for submission will be noon Monday 2nd week of Trinity Term.

**Key Texts:**

The following texts are indicative, students will receive suggestions for readings in the lectures.

- Carina Mood. (2010) 'Logistic Regression: Why We Cannot Do What We Think We Can Do, and What We Can Do About It', *European Sociological Review* 26 : 67–82.

**Stata-related texts:**

Other useful reading:

Online Social Networks

Course Providers: Dr Bernie Hogan, Oxford Internet Institute, bernie.hogan@oii.ox.ac.uk

Aims:

The internet is but one of many networks. Every network is different in its own way but there are striking similarities, whether we refer to traffic routing, infectious diseases, friendships on Facebook or gossip on Twitter. This course represents a primer in social network analysis [SNA], a longstanding approach to the generation and analysis of network data.

SNA, also sometimes called structural analysis, has been at the forefront of many of the most considerable insights in sociology, from inequality in jobs, to political polarization. Yet, network analysis extends beyond sociology in important and significant ways. From computer science, we learn optimizations for graphs and new ways of visualizing them. From statistics, we learn which networks are likely to appear by chance. From physics, we learn of large scale cascading behaviour and ways of detecting communities. Collectively, these insights comprise a new field called network science.

In this course, we introduce many of the fundamentals of social network analysis, from graph theory through personal networks to newer network science approaches and advanced statistical modelling. Each week includes reading summaries and exercises designed to build the student’s capacity for network analysis. We conclude the course with a critical interrogation of network analysis to help circumscribe some limits to this otherwise exciting and powerful paradigm. The result is a well-rounded course designed to enable the effective use of networks in research.

Prerequisites:

- Successful completion of Intro to Scripting with Python is a requirement for this course. The course will be teaching networks using python.
- It is also encouraged that the student have introductory statistics and is taking data wrangling in parallel although these are optional. Many students will successfully complete a qualitative approach to network analysis without complex statistics. Regardless, python is required for the successful completion of the formatives.

Key themes:

- What differentiates social networks as analytical objects from the reality they seek to represent?
- How do the descriptive measures of networks inform us about macro social structures as well as micro social behaviours?
- How do the affordances and constraints of online technologies help facilitate certain kinds of network structures (and indeed, even the notion of networks as analytical tools in the first instance)?
- Why do networks as visual objects persist in having a rhetorical power? Is it that they are merely ‘sciency’ and complex looking or should we consider the visual presentation of networks as a meaningful scholarly practice?

Topics covered by this course include:

1. Introduction
2. Ego-centred network data collection
3. Sociocentric and partial data collection
4. Dyads and homophily
5. Communities and clusters
6. Dynamic and Generative models
7. Network cognition and visualization
8. Theorizing beyond the network

Course Objectives:

The course will familiarise students with the state of network science as a paradigm comprising multidisciplinary approaches to the analysis of relational data. Students will be able to read introductory network metrics and understand how these measures speak to theories of human behaviour as well as put together an original piece of analysis using network data. Students will gain a modest understanding, via the ‘sociology of science’, as to why network analysis is a highly distributed field where no single software application, journal or conference covers all of the active research on social networks. Students will also learn basic data capture and analysis techniques that can enable them to begin, if not complete, a full social network analysis study.

Learning Outcomes:

Upon successful completion of this course students should:

- Have a familiarity with the basic terms and concepts of social network analysis.
- Understand how differing network analysis metrics relate both to each other and to academic research questions.
- Be able to describe how a network can be constructed from an online phenomenon.
- Have a clear understanding of some of the various analytical tools used in network science.
- Be able to construct and theorise a research question that employs social network analysis in order to address a specific topic related to human behaviour and collective dynamics.

Teaching Arrangement:

The course will consist of eight classes taught in weeks 1-4 and 6-9 of Hilary term. The date, time and venue will be communicated to students during Michaelmas Term.

Each class will begin with an hour-long lecture. The second half of the class is typically a guided walkthroug of network analysis techniques. The techniques draw upon a variety of software packages and data sources. Every effort will be made to ensure cross-platform and open source software is used whenever possible, but this cannot always be guaranteed.

Course Assessment:

Students will be assessed through a final essay that is no longer than 5000 words which must be submitted to the Examinations School by 12 noon of Monday of Week 1 of Trinity Term. Your essay for this course can be in one of any of the following three styles:

1. A critical review of a concept in social network analysis. In this sort of essay, you will have to select a concept that has been introduced in the course and provide a review of the concept that includes a thorough review of empirical research, an outline of the outstanding issues with the concept and contemporary analytical or methodological approaches to the concept. This should also contain some novel synthesis rather than mere description.
2. A novel analysis of an existing data set. This is an analytical route that is suitable for a student planning to explore complex statistical approaches such as ERGms / SOAMs / big data analysis / network econometrics. As these models are tedious and slow to run as well as mathematically formidable, most of the work will involve the building and testing of the models alongside diagnostics and visualizations.
3. A descriptive analysis of novel data. This requires you to collect your own data. The emphasis in the essay will not be on complicated modeling so much as the methodological concerns involved in collecting the data. You will be expected to provide basic descriptives and visualizations where appropriate. You should report on the network(s) in such a way that their description will speak to a relevant research question.

Essays should be formatted using APA style and absolutely must contain a guiding research question. The essay topic should be agreed upon by the student and the course instructor prior to submission (see the following section).
Formative Assessment
Each week there will be a formative assignment. In weeks 1-4 the assignment will be a small analysis of a network done in an ipython notebook. In week 5 the student is expected to submit a final essay topic for approval. This will be a title and a <200 word summary of the topic. In weeks 6, 7 and 8 the students will again have short exercises to do in ipython (or related software) based on the course material. In week 9 the student will be expected to submit a preliminary piece of writing (between 1000-1500 words) that will form part of the final essay. The course instructor will provide written feedback of the writing and seek to schedule a meeting to discuss the writing after term ends and before papers are due. The purpose of this second piece is to demonstrate to the instructor that the proposed topic has sufficient literature / theoretical motivation and data to continue pursuing.

In addition to the formative assignments the course instructor will direct students to a wiki, housed at [http://wiki.oii.ox.ac.uk/](http://wiki.oii.ox.ac.uk/). It will include headers for each of the readings for the weeks. Students are each expected to write a brief summary of at least two papers featured in the course. This way, by the end of course, every student will have a shared, thorough annotated bibliography to help them with their summative essay.

Submission of Assignments
All coursework should be submitted in person to the Examinations School by the stated deadline. All coursework should be put in an envelope and must be addressed to 'The Chairman of Examiners for the MSc in Social Science of the Internet C/o The Clerk of Examination Schools, High Street. Students should also ensure they add the OII coversheet at the top of the coursework and that two copies of the coursework are submitted. Please note that all work must be single sided. An electronic copy will also need to be submitted to the department. Please note that all coursework will be marked anonymously and therefore only your candidate number is required on the coversheet.

Please note that work submitted after the deadline will be processed in the standard manner and, in addition, the late submission will be reported to the Proctors' Office. If a student is concerned that they will not meet the deadline they must contact their college office or examinations school for advice. For further information on submission of assessments to the examinations school please refer to [http://www.ox.ac.uk/students/academic/exams/submission/](http://www.ox.ac.uk/students/academic/exams/submission/). For details on the regulations for late and non-submissions please refer to the Proctors website at [https://www.admin.ox.ac.uk/proctors/examinations/candidates/](https://www.admin.ox.ac.uk/proctors/examinations/candidates/).

Any student failing this assessment will need to follow the rules set out in the OII Examining Conventions regarding re-submitting failed work.

Key Texts:

**Political Sociology**

**Course Provider:** Prof Stephen Fisher

**Aims:**
To introduce students to advanced research in political sociology and to prepare students for doctoral research in this area. The course encourages students to become familiar with and capable of engaging with the current research issues and debates in the field. So the reading list is designed to include a selection of the most important texts and a more comprehensive list of the most recent research from the top journals and publishers. The reading list is available from the course provider on request.

**Topics covered by this course include:**

The social circumstances of politics and the impact of politics on society: the organization and representation of interests; the formation and change in political identities, attitudes and social cleavages, and their relationships with the political process. Candidates will be expected to be familiar with the main theoretical approaches to political behaviour and a broad range of both single country and comparative studies.

**Content and Structure:**

The paper covers research on the social bases of politics, such as the roles of class, religion, gender and ethnicity; the factors affecting political behaviour such as protest participation, electoral turnout and vote choice; how citizens relate to the political process, including political culture and the effects of the media; how social and political identities and attitudes are formed and how they change.

**Learning Outcomes:**

By the end of this course, students should:
- be familiar with empirical research in political sociology, the technical tools used, and the empirical results obtained;
- be skilled in critiquing research in the area on both theoretical and empirical grounds;
- be prepared to undertake doctoral research in this area.

**Teaching Arrangement:**

There will be eight classes in Hilary term. Students will be expected to make at least one and up to three presentations and write three essays. These will be opportunities to receive feedback on ideas and arguments from the course provider and other students. Students are expected to engage constructively in the discussions on all the topics covered in classes. The class is only open to those doing the formal exam, since there is not usually room for ‘auditors’.

**Course Assessment:**

The formal assessment is by a traditional three-hour unseen examination for which candidates have to answer three questions.

**Class Topics:**

The classes will cover eight topics from the following list. The selection will depend on the preferences of the students taking the course, making sure that all students’ interests are adequately catered for.

1. Class
2. Ethnicity
3. Anti-immigrant sentiment and extreme-right parties
4. Religion
5. Gender
6. Nationalism
7. Social attitudes
8. Social movements
9. Political participation and turnout
10. Political culture and social capital
11. Party identification
12. Media and campaign effects
13. Theories of voting

**Background Reading:**

There are no core texts for the course. Readings overlap very little between topics. However, the following provide some helpful background reading.

Social Movements

Course Provider: Dr Michael Biggs

Aims:

This option introduces the sociological literature on social movements and collective protest, including theoretical approaches and empirical methods.

Topics covered by this course include:

Explanations for the origins of social movements. Explanations for the outcomes of social movements. This year we will pay special attention to the movement for LBGT rights, which is arguably the most successful movement of the 1960s.

Content and Structure:

There will be eight classes, including the following topics:

- historical origins
- mobilization for Civil Rights in the American South
- contesting power
- dynamics: positive feedback
- movement cultures and organization
- do social movements make a difference?
- mobilization for LBGT rights since the 1960s
- contemporary trends

Learning Outcomes:

On completing the course, students will be familiar with a variety of social movements, and will understand the major theoretical approaches and the various empirical methods used by sociologists. Most importantly, they will be able to formulate a research project that can contribute to the sociological literature.

Teaching Arrangement:

There is a weekly class in Hilary Term. Students will contribute:

- three essays (about 2000 words) on the week's topic;
- one presentation (no longer than 15 minutes) summarizing the literature and sketching a research project that would advance our understanding of this topic.

Course Assessment:

One three-hour unseen examination in Trinity Term.

Key Texts:

Social Stratification

Course Provider: Prof Colin Mills

Aims:

The paper introduces students to contemporary research on social stratification, so that they are able to apply advanced concepts and techniques to their own research problems.

Topics covered by this course include:

The major forms of social stratification; their relation to economic and political institutions. The course will concentrate mainly on industrial societies; the structure of social inequality; prestige hierarchies and status structures; class formation; social mobility; processes of ‘social selection’ and status
attainment; social stratification and sub-cultural variations. Social stratification in relation to social integration, conflict and change, with special reference to industry and politics.

Content and Structure:

This course examines the central debates about stratification and social mobility in contemporary societies. For example, what explains the sharp rise in income inequality in recent decades? Why has the gender gap in educational attainment disappeared? How much inequality is there between countries, and is global income inequality growing or shrinking? Are social classes becoming less relevant in modern societies? How do class advantages and disadvantages get passed from parents to children? In what sense can Britain be said to be a meritocracy? How does cultural inequality map onto social inequality? Students are introduced to the central concepts and theories, the key methodological issues in stratification research, and the main empirical results.

Learning Outcomes:

On completing this course satisfactorily, students should:

- have a thorough understanding of the empirical results in contemporary stratification research;
- understand how methodological issues in stratification research are related to theoretical concepts and substantive questions;
- be able to relate sociological stratification research with that done by economists and psychologists.

Teaching Arrangement:

Eight classes in Hilary Term. Students are expected to write four short essays (of no more than 1500 words each).

Course Assessment:

One three-hour unseen examination in Trinity Term.

Key Texts:

- Devlin, B. et al. eds. (1997) Intelligence, Genes and Success, Copernicus.

Sociology of China

Course Provider: Prof Rachel Murphy and Dr Hamsa Rajan

Content and Structure:

China’s transition to a market society has produced dramatic changes in the lives of its citizens. In this course we will consider pressing social concerns that confront China as it continues its ongoing reforms and integration into the global community. Throughout the course we use comparisons from within China across historical periods, regions and social groups, and from other developing and late/post-socialist societies to enrich our analysis of key dimensions of social change. Example questions with which we engage include:

- Does equality hinder growth?
- Can rural residents claim a share of the economic growth?
- Who wins and who loses from the nation’s fertility limitation policies?
Can the children of rural-urban labour migrants’ achieve social mobility and urban citizenship through education?

What are the obstacles to rural and urban Chinese women achieving gender equality in marriage and before the law?

Are China’s ethnic minorities disadvantaged in education and employment?

How do intersecting inequalities among China’s citizens manifest themselves in differences in health outcomes?

We also evaluate Chinese civil society actors’ and policy-makers’ evolving approaches for conceptualising and dealing with the nation’s most urgent social concerns. We pay attention to how state and non-state actors interact with each other to affect policy interventions. We further examine the ways in which state actors continually revise their strategies for ensuring the strength and stability of the nation overall and the wellbeing and/or political acquiescence of sub-groups in particular.

Learning Outcomes:

On successfully completing the course, students should:

- See how China – as a developing society, a late socialist society and a rapidly industrialising society – can be studied through a sociological lens.
- Become familiar with academic research on social change in contemporary China.
- Be prepared for advanced research in the sociology of China

Teaching Arrangement:

The teaching comprises eight sessions in the Hilary Term – a one-hour lecture followed by a one-hour discussion class.

In the first week we look at China’s socialist legacy and the ways in which socialist institutions intertwine with other formal and informal institutional arrangements to affect associational life and the relationship between society and individuals in late/post-socialist China. In successive weeks we use selected problems to explore wider issues of social change and stratification across gradients of residency, class, gender, ethnicity and citizenship designation.

Each student is expected to write two essays during the course of Hilary Term. Students must come to class having done the assigned readings. Each student is expected to actively contribute to the class discussions and the interventions in the class should be based on careful consideration of the readings.

Course Assessment:

Assessment is by a three hour examination in Trinity Term.

You are also required to write a minimum of two unassessed practice essays for supervisions during the course of Hilary term on which you will receive detailed written feedback.

Key Preparation Texts:

Sociology of Gender

Course Providers: Prof Oriel Sullivan & Dr Pierre Walthery

Aims:

This option aims to introduce candidates to the sociological literature explaining the causes and consequences of contemporary gender inequalities in industrialised societies.
Topics covered by this course include:

We focus on the state, the labour market, the domestic sphere and women's representations and position in industrialised societies as arenas of gender inequality. Students will be familiarised with theories and literature about gender inequalities, and the mechanisms and institutions through which gender inequalities are produced and reproduced will be discussed.

Contents and Structure:

There will be eight classes, covering the following topics:
1. Gender inequalities; perspectives and trends
2. Gender in schools and the education system
3. Gender inequalities in the labour market I: The gender wage gap
4. Gender inequalities in the labour market II: Occupational segregation
5. Gender inequalities in the home I: The domestic division of labour
6. Gender inequalities in the home II: Self-made women?
7. Gender, welfare states and public policy regimes
8. Ways forward: policies, action, and approaches for understanding processes of change

Learning Outcomes:

On completing the course, students will be familiar with the contemporary situations and trends relating to gender inequalities in industrialised societies. They will understand approaches to the theories and mechanisms that explain the processes leading to gender inequality. They will be capable of embarking on a research project on the subject.

Teaching Arrangement:

There is a weekly class in Hilary Term. Students will contribute short (1,000 word) weekly essays based on the reading for the class topics; and give one presentation of about 20 minutes summarizing and critically discussing the literature for one class. Attendance, keeping up with the weekly reading and active participation in the classes are requirements.

Course Assessment:

One three-hour unseen examination in Trinity Term

Introductory Texts:

Sociology of Human Rights

Course Provider: Prof Leigh A. Payne

Aims:

This course introduces students to advanced research on sociology in Human Rights, and prepares students for doctoral research in this area.

Topics covered by this course include:

New literature on the sociology of human rights has accompanied the recent transformations in human rights theory and practice. Some of this literature challenges classic sociological approaches to rights, particularly its focus on national and individual analyses in contrast to the universal and collective notions of human rights. New approaches draw on areas of sociology more compatible with the theory and practice of human rights around the world, such as sociology of law, public sociology, sociology of violence, social movements, cultural, race, ethnic, indigenous, women, LGBT and identity movements, inequalities, and political and economic marginalization and mobilization.
Content and Structure:

The eight weekly sessions will be divided into two parts.

Part II: Empirical Analysis of Human Rights: (5) Civil and Political Rights (state violations, violations in armed conflicts); (6) Economic, Social, and Cultural Rights (poverty & human rights; business & human rights; indigenous peoples & human rights; immigration & human rights; forced labour) (7) Gender & LGBT rights (hate crimes; female cutting; sexual and reproductive violence; rape as a war crime); (8) Environment & human rights

Learning Outcomes:

On successfully completing the lectures and tutorials, students should be:

- familiar with scholarship on sociology and sociological questions in Human Rights;
- able to prepare an analytical paper in the Sociology of Human Rights; and prepared for advanced research in these areas

Teaching Arrangement:

Two-hour seminar each of the eight weeks of Hilary Term; Tutorial sessions for each student to present their draft analytical paper and receive feedback in Trinity Term; Students will be assigned to provide feedback on the tutorial papers.

Course Assessment:

Unmarked: weekly preparation of discussion paper; draft of analytical paper for oral presentation; feedback on another student's analytical paper. Marked: final analytical paper due in Trinity Term.

Key Texts:

- M Frezzo, The Sociology of Human Rights
- D Levy, Sovereignty Transformed: The Sociology of Human Rights

Sociology of Japan

Course Provider: Prof Takehiko Kariya

Aims:

The main goal of this course is to develop an understanding of the features of contemporary Japanese society as a non-western and highly advanced society from a sociological perspective and to discuss how Japanese society has changed since WWII.
Topics covered by this course include:

What is Japanese society?; Education; School to work transition and youth problem; Workplace and employment; Family and demography; Social welfare and social policy; Social mobility and social stratification; ‘The lost decades’ and the post 3.11 disaster.

Contents and Structure:

The class content and teaching style will be adjusted to a certain degree based on the interests of individual students and the dynamics of the group as a whole. Both lectures and discussion formats will be utilized. We are keen to foster a lively discussion environment with/among students. In each week, two or three students are assigned to make short presentations of the readings with comments and questions. The class schedules will be divided into eight sections whose key topics are shown above.

Learning Outcomes:

On successfully completing the course, students should:

- understand features of contemporary Japanese society and its changes
- acquire a “sociological imagination” (a way of thinking “sociologically” both with sociological theories and methods) to understand contemporary (post-) industrial societies including Japan and UK.

Teaching Arrangement:

Eight classes in Hilary Term. Each student is expected to write a minimum of two essays and to make short presentations.

Course Assessment:

One three-hour unseen examination in Trinity Term

Key Texts:

*A more detailed reading list will be provided in class.

Note: This course is provided with collaboration with MSc and MPhil programmes in Modern Japanese Studies in School of Interdisciplinary Area Studies (SIAS).

Sociology of Mafias

Course Provider: Prof Federico Varese

Aims:

The course analyzes five criminal organizations that have emerged in different times and contexts: the Sicilian Cosa Nostra, the American Mafia, the Russian Mafia, the Hong Kong Triads and the Japanese Yakuza. We explore the extent to which these cases, notwithstanding their differences, share crucial characteristics and features. We examine the origins, structure, organizational norms, activities, relations with terrorism, transplantation and decline of mafia groups. We explore and tests propositions from the theory of protection.

Topics covered in this course will include:

Content and Structure:

The course focuses on the extent to which these organizations share particular features, and the extent to which they do not. It covers rituals and norms (week 1); what Mafias do in both legal and illegal markets (week 2); the organization (week 3); the way they invest their money (week 4); the role of women (week 5) and popular culture (week 5). The course examines parallels between state behavior in early modern Europe and Mafia behavior in depth (week 6&7), how mafias have emerged historically and how to fight them (week 8). The course is multidisciplinary and draws upon concepts from political theory, industrial economics, and political economy, as well as on the history and sociology of different countries, such as Hong Kong, Italy, Japan, Russia, and the United States.

Learning Outcomes:

On successfully completing the course, students should be familiar with:

- Key issues related to the origins, organization, activities, migration and decline of mafia groups;
- Key theories discussed in the course;
- The comparative method in Sociology and key concepts in Political Theory, Industrial Economics, and Political Economy.

In addition, students should be able to apply key insights to cases not covered in the course.

Teaching Arrangement:

Teaching will be through 8 weekly seminars. Every week students are expected to study the required readings and engage in class discussion.

Course Assessment:

Production of two “Reading Responses” (RRs) during the course of the Term, to be submitted by noon on Friday of Weeks 3 and 6 by email to the course provider. The RRs should not exceed two A4 pages (font 12). The course provider will supply the title of the RRs the week before, during class time. The work will be graded on a pass/fail basis. In case of fail, the candidate is allowed to resubmit once. If the candidate fails twice, or fails to submit none or only one of the RRs, s/he will have failed the course. Late submission will lead to penalization in the final grade.

Production of one assessed essay written unsupervised and unaided. The course provider will publish three Exam Questions on Friday of Week 8 at noon. Candidates will answer ONE of these questions and submit hard and soft copies of their essay to the Graduate Studies Administrator by noon on Friday of Week 11. This assignment must be no less than 3,500 words and no more than 5,000 words (inclusive of footnotes but excluding bibliography and appendices). An accurate word count must be declared on the first page of the essay. Students may not approach the course provider for clarification on essay questions or help with or feedback on the essay. Students are expected to draw on course readings; whilst they may be rewarded for drawing upon additional works, Examiners may reduce the mark of those who fail to cite course readings. Candidates should take seriously the word limits imposed (both upper and lower). If the word limit is exceeded then the examiners may decide not to mark the work; and if they do proceed then the mark may be reduced. Similarly those who write less than the minimum word limit may be penalized.

Key Texts:

Pre-course Viewings: Mean Streets; The Godfather: Parts One and Two; Goodfellas; Casino; Donnie Brasco; Narcos TV Series; Cartel Land (documentary).

Course Key Texts:

- Varese, F. 2017. Mafia Life. Profile and OUP.

Sociology of the Family

Course Provider: Prof Man Yee Kan and Dr Michael Grätz

Aims:

The course will introduce students to theories and research on the family in industrialised and post-industrialised societies.

Topics covered by this course include:

Trends in marriage, partnership, fertility, and divorce; Welfare policies and the family; The domestic division of labour; Diversity in family forms; Partner selection; Causes and consequences of divorce; Family forms and children’s well-being; Intergenerational solidarity and exchange.

Content and Structure:

We begin by considering the trends in marriage, fertility, and divorce, and the decline of the traditional male breadwinner model families in many industrialised societies. We also discuss welfare state policies which shape the trends in marriage and fertility, women’s labour market participation, and the domestic division of labour. We then discuss a number of important topics in family sociology: partner selection, relationships between family members, and implications of family forms for social inequality.

Learning Outcomes:

On successfully completing the course, students should:

- have acquired knowledge of important theoretical ideas in the field;
- understand the major trends in marriage and the family;
- be familiar with recent empirical research in family studies;
- be prepared to undertake doctoral research in the area of family sociology.

Teaching Arrangements:

Eight seminars in Hilary Term. Each student is expected to write four essays (1500-2000 words), prepare short presentations, and participate actively in the seminars.

Course Assessment:

One three-hour unseen examination in Trinity Term.

Key Texts:

Departmental Seminars

Departmental Seminars are held during term throughout the year in Seminar Room G, Manor Road at 12.45 on Mondays. A sandwich lunch is served at 12:30 for those attending the seminars. See the departmental website for further details.
Attendance at the Monday Departmental Seminars is mandatory for all taught course students. Students are highly encouraged to attend the Nuffield College Sociology Seminars on Wednesdays (17:00, Clay Room, Nuffield College).

**Thesis**

Students should aim to write (the equivalent of) a publishable paper for an academic journal. They are discouraged from embarking on data collection of their own for their thesis work as this is not usually practicable within the timescale of the MSc. Students working with data that is not publicly available must ensure that examiners will be able to access data if required. The thesis should contain details of how such access can be obtained. Students who make use of materials in languages other than English must, on request of the examiners, make available English translations (e.g. of transcriptions, code books, etc.) within a time period specified by the examiners, not usually expected to be more than one month. All students must complete a Research Ethics Checklist.

*There is a compulsory Thesis Workshop for MSc students at the beginning of Trinity Term.* Guidance on the presentation of the thesis can be found below. Students are asked to deposit one copy of their thesis with the Department.

Students can work on their thesis throughout July and August but must be aware that supervisors may be away for conferences and on leave over the summer period. Students are urged to contact their supervisor well in advance to coordinate dates for meetings and the submissions of drafts for comments over the summer period.

**Formatting**

All taught degree theses must:

- Use 12 point font, and preferably a serif font such as Times New Roman;
- Give the length of the text in number of words;
- Present the main text in double spacing with quotations and footnotes in single spacing. Place footnotes, where present, at the bottom of each page;
- Have numbered pages;
- Use referencing that corresponds to one of the established bibliographic conventions: preferably APA style and not Vancouver;
- Be submitted in English; unless for exceptional reasons otherwise determined by a relevant Board, in the term in which the candidate is first admitted.
- Be printed on white paper with a margin of 3 to 3.5 centimetres on the left and right sides of the page.
- Have no mention of Supervisor, acknowledgements or any other identifying remarks;
- Be identified by candidate number and not by the candidate's name.

The thesis should be of **no more 10,000 words**, with footnotes and tables **included** in this figure; **references and appendices are not included**. (As a guideline, Appendices should make up no more than 30% of the thesis.)

For the MSc there are no formal rules regarding binding styles; however the pages must be bound securely and not left loose-leaf or simply clipped together; please refer to previous theses in the department.

**Delivery**

Two typewritten copies of the thesis must be delivered to:

The Clerk of Schools
Examination Schools
High Street
Oxford

by the relevant deadline, in an envelope bearing the words "MSc THESIS IN

**SOCIOLOGY** in **BLOCK CAPITALS** in the bottom left-hand corner. It must be accompanied by a statement that the thesis is the candidate's own work except where otherwise indicated. This statement should be placed inside its own envelope inside the envelope containing the two copies of the thesis.

Also please submit the following electronically to the Graduate Studies Administrator:

- The full manuscript of the thesis in MS-Word or PDF;
- If applicable, syntax files that were used for quantitative data analysis (for instance the relevant .do-files if stata was used);
- In case of own data collection, a file (or files in a zip-archive) containing the raw data (transcripts of interviews, raw data from experiments, other collected material).

The data and syntax files remain the intellectual property of the student. The department will not use the submitted materials for any other purpose and will destroy both syntax files and own data collection after the final exam results for the student have been released.

**Examination of MSc Theses**

Theses submitted as part of a taught course are marked by two examiners for the award of the relevant degree. If they cannot agree on a mark, or for some other reason require more information to reach a fair judgement of the work, the examiners can decide to also examine the thesis in an oral examination (Viva) at relatively short notice; students are therefore advised not to leave Oxford until they have received their final degree results around mid-September.

**Deadlines/Workshops for MSc**

These are the main deadlines and workshops for the taught courses. Lecturers may request additional course work, e.g. essays for your optional paper, with deadlines not included in this list. Deadlines for the options Social Network Analysis, Mafias, and Political Sociology can be found in the section on Option Papers.

+ Two copies.
* All assessed coursework must be accompanied by a statement signed by the candidate indicating that it is the candidate’s own work, except where otherwise specified. This statement must be submitted separately in a sealed envelope addressed to the Chair of Examiners.

* Director of Graduate Studies (submit to the Graduate Studies Administrator).
# Clerk of the Exam Schools; this means you have to submit the work to the Examination Schools on the High Street (http://www.ox.ac.uk/students/academic/exams/submission)

Examination Criteria and Marking Scale

Candidates are examined on the basis of examination scripts, thesis, critical essay and coursework. The main criteria applied by the examiners in judging this material are analytical quality, ability to apply the theoretical and methodological approaches that have been taught, critical awareness of alternative approaches and sources of data, and knowledge of the substantive literature.

A mark of zero shall be awarded for any part or parts of questions that have not been answered by a candidate, but which should have been answered. Where a candidate has failed to answer a compulsory question, or failed to answer the required number of questions in different sections, the complete script will be marked and the issue flagged. The board of examiners will consider all such cases so that consistent penalties are applied.

Where a candidate presents a thesis (or other exercise) which exceeds the word limit prescribed by the relevant statute, decree or regulation, the examiners, if they agree to proceed with the examination of the work, may reduce the mark by up to ten marks. This also applies to late submissions.
The scale of marks used by examiners and assessors for all subjects is shown below.

**MARKING SCALE**

</tbody>
</table>

Marks of 70 and above represent distinction grades, marks from 50 to 69 are pass grades, and marks below 50 represent a fail.
The majority of components are double marked (blind), and the examiners normally agree an overall mark prior to the examiners’ meeting. In the event that this is not possible then the external examiner reads the script to adjudicate the mark.

Routine scaling of marks is not undertaken. However, where the marks of an individual assessor, examiner, paper or question are outside the normal range of variation, a process of moderation, decided by the Chair of Examiners, may be undertaken.

If a student requires a deadline extension for any work that counts towards their final mark, they will need to apply to the Senior Tutor in their college who will then write to the Proctors. Deadline extensions need to be applied for in advance and have to be accompanied by a medical note. The Proctors then decide if the reason is valid and inform the examiners. The department cannot grant extensions and penalties may be incurred for late submissions.

If a student does not submit their thesis, or fails to turn up for any of their exams, the student will be allowed to resubmit the piece or work or resit the exam one time; the mark of this second submission/sitting will be capped. (In most cases, it is better to hand in a bad thesis/complete an exam and fail, than to hand nothing in at all. If you find yourself in this situation, please contact your College as soon as possible to discuss the situation with them, as all extensions or applications for ‘factors affecting performance’ must go through the College in the first instance.)

PASS: To pass the course, candidates must achieve 50 or more in all components. If a candidate fails just one component of the MSc, and it is a marginal fail (i.e. not less than 48) they can still be awarded a degree without distinction if they achieve a mark of 64 or above in another component.

DISTINCTION: The examiners may award a distinction for excellence in the whole course. To obtain a distinction, candidates should obtain a mark of 70 or above in at least half of the components and an average mark of 70 or above, across all components. Candidates who have initially failed any element of the examination will not be eligible for the award of a Distinction.

FAIL: A candidate who fails a taught degree may enter for one subsequent examination only, provided this is still within six terms of his or her initial registration. A revised version of the same thesis may be resubmitted and will be examined afresh by the examiners on the second occasion. No component can be retaken if passed first time round.

The Proctors’ rules concerning arrangements in cases of illness, disability, etc., are detailed in the Examination Regulations. Subject to the provisions given in these notes, a candidate who fails to appear at the time and place appointed for any part of his or her examination shall be deemed to have withdrawn from the examination.

Course Evaluation and Student Feedback

The Department of Sociology is concerned that students have the opportunity to comment on the structure, teaching and content of each of the courses. Student feedback will thus be sought through the use of student evaluation forms. Students will also have the chance to participate in leavers’ focus groups over the Long Vacation (more information will be provided closer to the time).

Feedback on Formative and Summative Assessment for PGT Programmes

Feedback on both formative and summative assessment is an important element of all programmes at Oxford and may be provided informally and/or formally.
Feedback on formative assessment e.g. course essays or assignments, should provide guidance to those for whom extended pieces of writing are unfamiliar forms of assessment; will indicate areas of strength and weakness in relation to an assessment task; and will provide an indication of the expectations and standards towards which students should be working.

Feedback on summative assessment e.g. theses and dissertations, should provide a critical review of the work and provide suggestions for improvements and future development of the topic of research, to enable students to develop their work for doctoral study if appropriate. Students can expect to receive informal feedback on their progress and on their formatively assessed work.

For Sociological Analysis students will receive written comments from a teaching assistant on the weekly memo. For Optional Papers, course providers will give students written comments on essays submitted in Hilary Term. Students will also receive written comments on their STATA assignments in Michaelmas Term.

All students on taught Masters programmes can expect to receive formal written feedback on at least one designated piece of formative assessment that is normally submitted during the first term (or very early in the second term) of the course.

All students will also receive formal written feedback on the thesis submitted in the final term of the course.

Students studying for the MSc will receive formal written feedback via email on their Sociological Analysis Term Essay which is submitted on Monday of 1st Week in Hilary Term.

Students will receive formal written feedback on their theses submitted in the final term of their course, via email within one week of the final Exam Board convening.

Supervision

All graduate students have a University Supervisor. The University Supervisor guides the student through his or her course of study.

The Supervisor reports on the student’s progress to the Teaching Meeting at the end of each term and will also provide feedback to the student. The advice of the Supervisor will always be sought by the GSC before recommending any change in status, transfer between courses, and so on. It is of great importance for the student to keep in regular contact with his or her Supervisor and to keep the Supervisor fully informed as to the progress of his or her studies.

Students and Supervisors are required to electronically submit a termly progress report to the Graduate Supervision System (GSS).

Graduate Supervision System

The Graduate Supervision System (GSS) is used by Supervisors each term to review, monitor and comment on their student’s academic progress and performance and to assess skills and training needs. Students are given the opportunity to contribute to their termly supervision reports by reviewing and commenting on their own academic progress. All students are required to submit a GSS report each term.

Students will receive a report of their termly supervision from their Supervisor. Divisions, Departments and Colleges use the completion of supervision reports as an essential means of monitoring student progress.

The supervision reporting process is controlled by a structured timetable with automatic notifications and reminders. Once reports are submitted they are immediately available to the student, Supervisor and DGS
for review. Additionally, Subject Administrators, College Advisors, College Administrators and Scholarship and Funding Administrators are able to view reports. http://www.admin.ox.ac.uk/gss/guidanceforstudents/

Graduate students will also all have a College Adviser. The role of the College Adviser is to provide pastoral and general academic advice. They can be particularly helpful if the student has any academic or other difficulties that he or she does not feel able to discuss with the University Supervisor.

**Change of Supervisor**

It may be appropriate in some cases to change Supervisor if, for example, the direction of the student’s work changes. The Graduate Studies Committee and all university Supervisors also recognise that occasionally there can arise incompatibilities of temperament or approach between Supervisor and student. Because of the central importance Oxford attaches to the relationship between Supervisor and student, students are urged to discuss any problems of this kind freely and in full confidence with the Taught Course Director. An alternative method of approach in such cases is through the student’s College Advisor or College Tutor for Graduates. A change of Supervisor requires the approval of the Graduate Studies Committee.

**Code of Practice for Supervisors of Taught Course Students**

Supervisors responsible for oversight of progress of Masters’ students on taught courses are expected to:

- Meet with students (in general twice or more per term)
- Discuss progress, feed-back comments to course providers, course directors and DGS, report on progress to the termly Teaching Meeting
- Assist in choice of options papers
- Help in the development of thesis topic
- Write termly reports on the student on GSS

In addition to the above, Supervisors are expected to provide the following with respect to Masters theses:

- Frequent meetings with students to discuss progress of thesis (informal guidelines: for MSc students in general three or more meetings during summer vacation)
- Timely responses to materials submitted for comment
- In particular, comment on final drafts in good time for students to respond before final submission
- Ask to see transcripts of interviews, or syntax files in data analysis to check that the thesis is indeed the student’s own work

This last obviously depends on Supervisors’ availability in Oxford during the summer vacation months, and on students’ timely submission of drafts.

Supervisors should provide a reasonable level of availability during the summer; it is the student’s responsibility to arrange dates for submission of work to Supervisors—but it would be helpful if Supervisors could warn students of any extended period of unavailability during the month before the thesis submission date.

**Regulations Governing Graduate Degree Courses**

Below is a summary of the most relevant rules. In exceptional circumstances it may be possible to seek dispensation from these rules. Students should consult the Examination Regulations http://www.admin.ox.ac.uk/examregs/ for the full text and seek further advice from their Supervisor.
**Plagiarism**

**What is Plagiarism?**

The JISC Plagiarism Advisory Service (2003) states that: ‘Plagiarism is the presentation of someone else’s work as though it were your own’. You may be found guilty of plagiarism if:

- You are presenting or passing off another person’s work as your own
- You import into your own work ‘more than a single phrase from another person’s work without the use of quotation marks and identification of the source’
- You make ‘extensive use of another person’s work, either by summarising or paraphrasing it merely by changing a few words or altering the order of the presentation, without acknowledgement’
- You use ‘the ideas of another person without acknowledgement of the source’ or submit or present work as your own’ which is substantially the ideas or intellectual data of another
- You make ‘a deliberate attempt at passing off the ideas or writings of another person as your own’
- You take ‘the words, ideas and labour of other people and give the impression that they are your own.’

**Plagiarism and University Policy**

Cases of apparently deliberate plagiarism, while happily infrequent in the University, are taken extremely seriously, and where examiners suspect that this has occurred, they bring the matter to the attention of the Proctors. For further details, please refer to: http://www.admin.ox.ac.uk/proctors/pam/section9.shtml

Your attention is drawn to the Proctors’ and Assessor’s Memorandum, Section 9.5, ‘Conduct in Examinations’ and in particular to Sections 4 and 5 and the concluding paragraph of the section:

4. No candidate shall present for an examination as his or her own work any part or the substance of any part of another person’s work.

5. In any written work (whether thesis, dissertation, essay, coursework, or written examinations) passages quoted or closely paraphrased from another person’s work must be identified as quotations or paraphrases, and the source of the quoted or paraphrased material must be clearly acknowledged.

“The University employs a series of sophisticated software applications to detect plagiarism in submitted examination work, both in terms of copying and collusion. It regularly monitors on-line essay banks, essay-writing services, and other potential sources of material. It reserves the right to check samples of submitted essays for plagiarism.

Although the University strongly encourages the use of electronic resources by students in their academic work, any attempt to draw on third-party material without proper attribution may well attract severe disciplinary sanctions.”

**Procedure for dealing with cases of poor academic practice and plagiarism in taught degree examinations**

**Level 1: procedures for Examination Boards**

If a marker, or a Turnitin report generated in the course of examination procedures, raises concerns about the proper attribution of a passage or piece of submitted work, the matter will be reported to the Chair of Examiners. The Chair will compile and retain any evidence and decide whether or not the case is one which may be dealt with by the Board (poor academic practice) or whether it is one that requires reference to the Proctors for investigation and possible disciplinary action. The Chair may consult the Proctors in cases of doubt.

The following step-by-step guidance is provided in order to assist the Chair with this decision.
Step 1

If the concern has been identified by a high Turnitin score, follow the separate guidance on interpreting Turnitin reports (Appendix 1) to establish the report's accuracy.

If the concern has been identified by a marker, examine the source the marker has referred to; or in the case of suspected collusion or copying between students, examine all pieces of work giving rise to this concern.

Step 2

Consider the characteristics of the concerning passage(s).

Characteristics of cases to be dealt with as poor academic practice

In all cases dealt with wholly by the Examination Board the extent of the material under review must be a relatively small proportion of the whole. Small will be in the context of the length of the work but as a guide it will not exceed 10%.

If the case is then best described by one or more of the criteria below, on balance this is likely to indicate a case of poor academic practice and can be dealt with by the Examination Board.

- The material is widely available factual information or technical description that could not be paraphrased easily.
- The passage(s) draws on a variety of sources, either verbatim or derivative, in patchwork fashion. This is likely to indicate poor English/poor understanding rather than an attempt to deceive.
- Some attempt has been made to provide references, however incomplete (e.g. footnotes but no quotation marks, Harvard-style references at the end of a paragraph, inclusion in bibliography)
- The passage is 'grey literature' i.e. a web source with no clear owner
- The student is not known to have previously received a marks deduction for poor academic practice or been referred to the Proctors for suspected plagiarism. (This will only be relevant for Honour Schools examined in Parts, or master's courses with multiple submission deadlines.)

Thresholds for reference to the Proctors

If the concerning passage(s) meets any of the criteria below, this is likely to indicate that referral to the Proctors is warranted.

- The extent of the material under review is a substantial proportion of the whole.
- The material contains passages of analysis or research data that is clearly the intellectual property of the original author.
- The passage(s) exhibits heavy reliance on one source which may indicate plagiarism of ideas/arguments.
- There is evidence that the student has copied the development of an argument (which may not be verbatim quotation – it could involve paraphrasing a line of argument or sequence of points).
- There is evidence of copying or collusion between students.
- The student has previously received a marks deduction for poor academic practice or has been referred to the Proctors for suspected plagiarism in the same or earlier programme of study.
- The submission clearly infringes rules on resubmitting material (autoplagiarism) for examination.

Step 3

Where the Chair finds that the matter can be dealt with by the Board, assessors will mark the work on its academic merits. The Board will then deduct marks for derivative or poorly referenced work according to a predetermined scale set out in the marking conventions. Boards are free to operate marks deductions of between 1 and 10% (maximum) of the marks available for that particular piece of work. In practice, it will often be difficult to operate very fine-grained distinctions and it is acceptable for examination boards to exercise their judgement within a small range of ‘bands’ e.g. on a 100 point scale a Board might judge cases to fall in one of three bands for which 3, 6, or 10 marks are deducted. Where the consequence of the marks deduction would result in failure of the assessment and of the programme (i.e. no resit opportunity) the case must be referred to the Proctors.
Where the Chair finds that the matter should be dealt with by the Proctors, the Chair should follow the steps outlined in Level 2 below.

Step 4

For their academic development, students should be informed that marks have been deducted for poor academic practice if they have further examinations to take during their course (for example if it is a preliminary examination, a part of a FHS examination before the final year, the qualifying examination for MPhil, or early examinations for other master’s courses), and an explanation should be given of where and how in their work this was evidenced. This feedback should be provided via the Chair of Examiners to the Senior Tutor in the case of undergraduates, or the Course Director in the case of graduates. Students should also be reminded of the disciplinary regulations concerning plagiarism.

**Level 2: procedures for the Academic Conduct Panel**

Examination Boards will refer cases to the Proctors’ Office if the Chair has made a decision that a case exceeds the criteria for dealing with Level 1.

Step 1

The Chair should first summarise the case for the Proctors indicating the relevant sources, extent, and seriousness of the plagiarism. A report printout from Turnitin is insufficient on its own and will be returned to the Chair for analysis and summary. In cases of students suspected of colluding or copying from each other, the Chair should examine the work of both the students involved, so that the nature of the apparent collusion can be established. All materials should be securely submitted to the Proctors’ Office. Support will be provided by a caseworker in the Proctors’ Office who will ensure all relevant materials are collated and presented.

Step 2

The case will be given initial consideration by one of the Proctors who will determine whether it is a case that should be referred back to the examiners to deal with at Level 1 (in cases where the Chair has asked for advice), a suitable case for the Academic Conduct Panel, or one that is so serious that it should be directed to the SDP. Cases where it is likely that the outcome would result in failure of the whole degree will always be referred to the SDP.

Step 3

If it is decided that the case should proceed to the Academic Conduct Panel, the student’s consent will be sought, offering the alternative of referral to the SDP. The student will be notified as soon as possible by the Proctors’ Office that their work has been referred to the Panel, except in circumstances where they are currently undertaking examination. In these cases, steps should be taken to delay notification to the student, and to notify the student at a time that will not interfere with ongoing exams.

Step 4

An interview with the student will be conducted between the Proctor and the student with a note-taker as part of the preparation for the Panel meeting; this may be by telephone, email questions, or other means of telecommunication. If, during the interview, the student admits a breach of the regulations, the Proctor may offer the student the option of the matter being concluded without further meetings. The Proctor will arrange for the Panel to agree a penalty by email correspondence (the Panel may not impose a penalty which is more severe than the Penalty recommended by the Proctor, and the student will have the right of appeal as set out under Appeal process below). Otherwise, paperwork for the Panel including a note of the interview, will be provided to the student who will be given a minimum of three clear days to submit any further information for inclusion.

Step 5

The Proctors will convene a meeting of the Academic Conduct Panel. The ACP will consist of three people: one of the Proctors; a person who has previously served as Proctor (preferably from the most recent Proctorial team for continuity) or as a member of the SDP; and a member with relevant subject
expertise (but not a member of the Examination Board). The Panel will be convened as necessary to deal with plagiarism cases referred to it. The Panel will consider cases within one month of referral by the Examination Board.

The student, supported by a friend or a Senior Member, will be invited to attend the meeting, but the Panel may go ahead without the student if they are unable to attend. The Panel may require the student to attend, or be available by telecommunication.

The Panel will have a range of outcomes available to it:
- Finding plagiarism has not occurred
- Directing that the student has support and training
- Deduction of marks for the piece of work: examiners will conclude examination
- Submission awarded 0% - resubmission required in order to conclude examination but mark not capped
- Submission awarded 0% - resubmission required in order to conclude examination and mark capped
- Serious Academic Misconduct - Referral to the Student Disciplinary Panel

The Panel cannot give a penalty that would result in the student failing the whole degree.

**Appeal process**

The student will be able to appeal a decision of the Academic Conduct Panel by sending a written appeal within fourteen days of receiving the Panel's written decision. Two members of the Academic Conduct Panel with no previous connection to the case will consider the appeal, and this will normally be a paper-based exercise.

The student will not be able to appeal a referral to the Student Disciplinary Panel; in such cases they will have the right to apply for permission to appeal to the Student Appeal Panel following the outcome of the Student Disciplinary Panel.

**Level 3: Student Disciplinary Panel**

The Student Disciplinary Panel will deal with the most serious cases of plagiarism, and those referred to it by the Proctors or the Academic Conduct Panel because the likely outcome would be failure of the whole degree.

The procedures and regulations set out in Statutes and Regulations apply [here](http://www.admin.ox.ac.uk/statutes/352-051a.shtml#_Toc28142346) and [here](http://www.admin.ox.ac.uk/statutes/regulations/234-062.shtml).

**Thresholds**

In addition to those cases referred to the Student Disciplinary Panel by the Academic Conduct Panel as described above, the Proctors may refer cases to the Student Disciplinary Panel directly after receipt from the examiners and after their investigation, but will only do so in what appear to be very serious cases. This is likely to include cases of apparent deliberate deception such as purchase of submissions from an essay mill or ghostwriting service, students with a history of plagiarism, very extensive plagiarism.

**Outcomes**

The Panel will have a range of outcomes available to it including:
- Submission awarded 0% - no opportunity to re-submit i.e. failure of programme
- Award classification reduced
- Failed award
- Expelled from institution and failed award
- Removal of a degree (in cases of former students)
- Additionally, any of the outcomes available at Level 2

**Online Plagiarism Quiz and Self-Tests**

By the end of Week 2, all students are required to take the Avoiding Plagiarism Tutorial ([here](https://weblearn.ox.ac.uk/portal/hierarchy/skills/plag)), and to email a copy of the certificate of completion to the GSA.

In addition, the websites for a number of online plagiarism tests are shown below. These tests will also help you to understand and avoid plagiarism in your work.
Third Party Proof-readers

Students have authorial responsibility for the written work they produce. Proof-reading represents the final stage of producing a piece of academic writing. Students are strongly encouraged to proof-read their own work, as this is an essential skill in the academic writing process. However, for longer pieces of work it is considered acceptable for students to seek the help of a third party for proof-reading. Such third parties can be professional proof-readers, fellow students, friends or family members. This policy does not apply to the supervisory relationship, nor in the case where proof-reading assistance is approved as a reasonable adjustment for disability.

The default position is that the guidance outlined below applies to all assessed written work where the word limit is 10,000 words or greater. However, departments and faculties may opt to specify that, for certain assessments, students should not be allowed any proof-reading assistance, if the purpose of the assessment is to determine students’ abilities in linguistic areas such as grammar or syntax. In this case, the rubric for the assessment should state clearly that no proof-reading assistance is permitted.

The use of third party proof-readers is not permitted for work where the word limit is fewer than 10,000 words.

What a proof-reader may and may not do

Within the context of students’ written work, to proof-read is to check for, identify and suggest corrections for errors in text. In no cases should a proof-reader make material changes to a student’s writing (that is, check or amend ideas, arguments or structure), since to do so is to compromise the authorship of the work.

A proof-reader may

• Identify typographical, spelling and punctuation errors;
• Identify formatting and layout errors and inconsistencies (e.g. page numbers, font size, line spacing, headers and footers);
• Identify grammatical and syntactical errors and anomalies or ambiguities in phrasing;
• Identify minor formatting errors in referencing (for consistency and order);
• Identify errors in the labelling of diagrams, charts or figures;
• Identify lexical repetition or omissions.

A proof-reader may not

• Add to content in any way;
• Check or correct facts, data calculations, formulae or equations;
• Rewrite content where meaning is ambiguous;
• Alter argument or logic where faulty;
• Re-arrange or re-order paragraphs to enhance structure or argument;
• Implement or significantly alter a referencing system;
• Re-label diagrams, charts or figures;
• Reduce content so as to comply with a specified word limit;
• Translate any part of the work into English.

Authorial responsibility

Students have overall authorial responsibility for their work and should choose whether they wish to accept the proof-reader’s advice. A third party proof-reader should mark up the student’s work with suggested changes which the student may then choose to accept or reject.

Failure to adhere to these guidelines could constitute a breach of academic integrity and contravene the Proctors’ Disciplinary Regulations for Candidates in Examination (http://www.admin.ox.ac.uk/statutes/regulations/288-072.shtml). It is therefore the student’s responsibility to provide the proof-reader with a copy of this policy statement.

Factors affecting performance

Where a candidate or candidates have made a submission, under Part 13 of the Regulations
for Conduct of University Examinations, that unforeseen factors may have had an impact on their performance in an examination, a subset of the board will meet to discuss the individual applications and band the seriousness of each application on a scale of 1-3 with 1 indicating minor impact, 2 indicating moderate impact, and 3 indicating very serious impact. When reaching this decision, examiners will take into consideration the severity and relevance of the circumstances, and the strength of the evidence. Examiners will also note whether all or a subset of papers were affected, being aware that it is possible for circumstances to have different levels of impact on different papers. The banding information will be used at the final board of examiners meeting to adjudicate on the merits of candidates. Further information on the procedure is provided in the Policy and Guidance for examiners, Annex B and information for students is provided at www.ox.ac.uk/students/academic/exams/guidance.

Failing the MSc

Candidates who have previously failed the MSc without extenuating circumstances cannot achieve more than a pass degree on retaking.

In the event of failure of the MSc overall, a candidate is allowed to retake/resubmit certain elements (meaning discrete pieces of written work, theses, tests, or examination papers). Any retakes/resubmissions for the MSc must take place the following year. A candidate may only retake/resubmit elements of those components that received a fail mark overall. If a candidate failed a component for which assessment is comprised of one or more elements, only those elements that received a fail mark may be resubmitted/retaken. Any elements for which the candidate achieved a pass mark cannot be resubmitted/retaken. Any elements that constitute part of a component that received a pass mark overall cannot be retaken/resubmitted, even if there are particular elements of the component that received a fail mark. Marks for any elements that are not retaken or resubmitted will not change.

If a candidate fails just one component of the MSc, and it is a marginal fail (i.e. not less than 48), they can still be awarded a degree without distinction if they achieve a mark of 64 or above in another component.

Any resubmitted written work (including the thesis) will be examined afresh. While there is no requirement to make substantial changes to written work before resubmission, candidates should note that fail marks are never awarded without careful consideration and minor editing is unlikely to be sufficient to transform even a marginal fail mark into a pass mark.

Candidates must re-register if they wish to retake any exam or resubmit their thesis. Re-registration must be completed at the same time and in the same way as registration for current students, i.e. in early Hilary term through the student’s college. They must also pay a fee for resubmission of the thesis and another fee for exam entry (details can be obtained from Colleges). A student must be both registered and their re-entry fee received by Exam Schools for their exam or thesis to be marked. The onus is on the student to arrange resubmissions in conjunction with their college and Exam Schools. The department is not involved in the process.

If a student does not submit their thesis, or fails to turn up for any of their exams, the student will be allowed to resubmit the piece of work or resit the exam one time; the mark of this second submission/sitting will be capped. (In most cases, it is better to hand in a bad thesis/complete an exam and fail, than to hand nothing in at all. If you find yourself in this situation, please contact your College as soon as possible to discuss the situation with them, as all extensions or applications for ‘factors affecting performance’ must go through the College in the first instance.)

For students whose thesis fails to attain a pass mark, the Department provides two Supervisory sessions before resubmission: one at the beginning of the academic year and one when the student has a complete draft of the (revised) thesis. If a student is retaking a component of the MSc that is assessed by unseen examination, the Department will provide a single Supervisory session to review
the student’s knowledge and understanding of the subject and advise on appropriate further study and revision. If a student is retaking a piece of coursework, arrangements will be made for the student to discuss with the relevant course provider an appropriate course of action to enable the coursework to be completed. Additional provision of assistance may be available to those who failed or could not complete the MSc due to illness or circumstances outside their control.

**Release of Examination Marks**

On advice from the University authorities, no marks are released until after the final meeting of the Examination Board for each course (September for the MSc). There will be no exceptions to this.

**Details of examiners and rules on communicating with examiners**

The External Examiner for the MSc Sociology for the 2017-18 academic year is Professor Chattoe-Brown (University of Leicester). The internal examiners are Professor C Mills (Chair), Professor Kariya, Professor Breen and two additional Examiners to be appointed in due course.

Candidates should not under any circumstances seek to make contact with individual internal or external examiners.

**Fees**

Fees are paid termly.

MSc students pay three terms of fees in total.

Fees are charged whether or not the student is working in Oxford. Fees are not charged if the student status is formally suspended by the Graduate Studies Committee.

College fees are also payable: candidates should enquire of their colleges about these.

**Residence Requirements**

The residence requirement is shown below. Students must be in Oxford for this period. Residence as a Recognised Student does not count towards residence required for Oxford degrees. Additional residence requirements may apply to scholarships or other forms of funding.

- for the MSc three terms

It is vital that every overseas student familiarises him/herself with UK Visa Rules and Regulations. Please refer to the UK Border Agency Website and the relevant section of the University Website. It is your responsibility to inform your Department and College of any change in circumstances, including address.

**Suspension of Status as a Postgraduate Student**

With the support of his or her Supervisor and college, students may apply to the Graduate Studies Committee for suspension of status for a specified period. If the application is approved, the candidate will not be liable to pay fees during the period of suspension and will automatically resume his or her former status at the end of the period.

The Graduate Studies Committee may consider applications for suspension on the following grounds:

- Where the student is prevented from pursuing his or her course of study in circumstances which are outside his or her control though there are good grounds for believing that he or she will be able to resume work within a reasonable period (e.g., physical or mental incapacity, maternity leave and unexpected domestic crises).
- To take up temporary work which is likely to be relevant to his or her subsequent career and the opportunity for which is unlikely to recur.
- Any such application should have the support of the student’s Supervisor and
College and should normally be for a specified period.

Candidates are expected to endeavour to complete their studies within the normal time limits for the course in question and the Graduate Studies Committee is not prepared to consider applications for suspension merely on the ground that a candidate wishes to engage, for personal reasons, in some other activity and then return to his or her postgraduate work at some later date.

Illness

The University records should show correctly for how many terms a student has been actively working on a thesis. Students whose work is unavoidably interrupted by illness are encouraged to apply for suspension of status immediately. ESRC-funded students must additionally comply with all of the ESRC’s regulations for suspension of the course. Failure to comply with these regulations may have serious consequences for the Department’s ability to award ESRC studentships in the future.

A candidate for the MSc whose illness is not serious enough or of too short duration to justify suspension of status may nevertheless feel that it is likely to have an adverse effect on his or her performance in the examination. In this case he or she must ask his or her Senior Tutor, Supervisor and doctor to take up his or her case with the Proctors, who have the option, at their discretion, of writing to the examiners and asking that the candidate’s illness be taken into account. Candidates should not write direct to the examiners, who cannot take account of pleas which do not arrive through the official channels.

Paid Work

Students may take on limited amounts of paid work but they should ensure this does not interfere with their studies. See the University’s paid work guidelines: http://www.admin.ox.ac.uk/edc/policiesandguidance/policyonpaidwork/

Ethical Review Procedures for Research

Research Ethics Review and Approval

The University’s policy and guidance on the ethical review of research undertaken by staff and students which involves human participants is available on the University website. Please ensure that you read and follow this guidance; it covers all research in which people participate in a direct way by, for example,

- answering questions about themselves or their opinions,
- or performing tasks - such as completing an online survey
- or being observed,
- all research which involves data about identified or identifiable people.

Why is ethics scrutiny and approval important?

- It is part of the responsible conduct of research.
- It demonstrates that your research has been conducted according to the highest ethical standards. It is important to protect the dignity, rights and welfare of all those involved in the research (whether they are participants, researchers or third parties)
- It is a University requirement.
- It is now the expectation - and in some cases formal requirement - of funding bodies.

What to do:

- Visit the Central University Research Ethics Committee (CUREC) site and identify if you need a CUREC form filled in using the decision flowchart.
- The University’s procedures have two stages to reflect the level of risk associated with the particular research project. The first stage is complete the first section of the checklist. Once you have done that the form will advise you whether to complete filling out the CUREC 1A or to complete CUREC 2.
- Fill out the relevant form well in advance of starting your research. You will not be
able to undertake any research until your application has been approved. Please start the process of completing the form and gather then required material as soon as possible. When writing any CUREC application, assume that you are the expert in your topic area and explain your project methods clearly and simply. This includes giving a clear idea of potential ethical issues and how you propose to address them. Remember that the ethics committee partially relies on your expertise as a researcher in your field, in order to be clear about the ethics of a project.

It is likely your application will need documents to support it and help to explain what you are doing. These documents can be broadly classified as for external (participant) or internal (researcher) use. Documents for external use include invitation letters/emails, information sheets, written consent forms, oral consent scripts, project recruitment advertisements, participant-completion surveys or questionnaires (paper or online). Please see the main CUREC page on informed consent for more details. Documents for internal use include sample research instruments (researcher-completion surveys or questionnaires, semi-structured interview guides), detailed study protocols, and record of oral consent forms.

In most cases, the Departmental Research Ethics Committee (DREC) will want to see final versions of external use documents in order to check compliance with the relevant University policy. As far as possible the DREC will also want to see examples of interview schedules and draft questionnaires. (We are aware that survey questions and other research instruments evolve as part of project methodology.)

- Please complete the form electronically and send it in Word format from your Oxford email account to drec@sociology.ox.ac.uk. As well as signing your form you will need to obtain your supervisor’s signature too. Applications are not valid until signatures and relevant supporting documents have been provided. There is more information about signatures in the checklist itself.

- Your form will then be reviewed by the Department Research Ethics Committee. Please note that the anticipated turn around on Ethics applications is 5 working days for CUREC 1A application and longer for CUREC 2 (more details here). Once your research has received ethical approval you will receive a letter to confirm this.

Approval of research using publically available data is routine. Ideally you should have completed the process of receiving ethical approval by the time you submit your thesis topic to the GSA in Week 8 of Hilary Term. Please ensure that you leave enough time to complete the forms, collect the requisite signatures, and for the approval process to take place. For projects requiring only CUREC 1A approval, applications submitted early in Hilary Term should have sufficient time for approval. If you believe that you may need CUREC 2 approval, please contact Agnieszka Swiejkowska, the Research Facilitator, in Michaelmas Term for advice.

Other resources:

- The Research Ethics Guidebook, funded by the ESRC as part of the Researcher Development Initiative and developed by a team at the University of London’s Institute of Education, is a guide through ethics review and regulatory processes for social scientists.

Risk Assessment, Insurance and Safety Considerations for Any Travel or Fieldwork

Any travel undertaken as part of University business requires the submission of a risk assessment, and qualifies for cover under the University’s travel insurance policy. It is vital that risk assessments and travel insurance applications are submitted at least one month before planned travel. Forms for high-risk travel should be submitted even further in advance, to allow the forms to be approved by the Divisional Safety Officer, and possibly by the University Safety Office. Both the risk assessment and travel insurance application forms can be found here:
https://weblearn.ox.ac.uk/portal/site:socsci-sociology.students:graduates

Please submit the completed forms to Kristiana Dahl – Graduate Studies Administrator (graduate-studies@sociology.ox.ac.uk)

You are advised to talk to your Supervisor at the earliest opportunity. In addition, you should make an appointment to talk to either the Departmental Secretary (Jane Greig) or the Graduate Studies Administrator (Kristiana Dahl) at least one month before the start of your trip. They can provide the appropriate forms and assist with the risk assessment process.

The need to complete a risk assessment should not be seen as an obstacle, but as an integral and fundamental part of travel and fieldwork preparation. Those conducting interviews in areas of high risk (e.g. areas of serious political unrest) or in an environment which poses a higher risk than the normal place of work (e.g. interviewing prisoners in a prison) must be able to demonstrate that they have thought properly about where risk may be present and describe clearly their proposed actions to mitigate such risk as far as is reasonably possible.

As a separate but related matter, you should always provide Jane with an itinerary and contact details for your next of kin, in order to meet university regulations.

Please be aware that you may need to complete a full risk assessment. (Whether this is required or not is determined by the type of activity you are to undertake and the location you are to visit). Your Supervisor will be able to offer advice in the first instance. Risk assessments are considered by either the Head of Administration and Finance or the Head of Department, who, in some instances, may need to refer it to the Divisional Safety Officer or the University’s Safety Office before approval can be given. After you have answered any questions raised by the Divisional Safety Officer or the University’s Safety Office, your risk assessment will have to be reassessed and approved by your supervisor before it is passed along for final authorisation by the Head of Administration and Finance or the Head of Department.

The Social Science Division and the University’s Safety Office run training courses each term which may be suitable for those planning extensive periods of fieldwork or those who are new to the idea of risk assessment. Jane Greig and Kristiana Dahl can advise on these.

Those travelling to risky areas or those carrying out particularly sensitive activities (wherever they may be being done) will be required to have their forms referred to the Safety Office for approval. Sufficient time in advance of the start of the trip must be allowed for this referral to take place.

**Travel Insurance**

A separate form is needed to apply for the University’s travel insurance. Please note that the University’s insurance will not be valid if you do not have a valid risk assessment and do not complete this process in good time. There is no cost to students associated with taking out University travel insurance, and the policy offers a good quality of coverage.

More information on the university’s scheme is available at: http://www.admin.ox.ac.uk/finance/insurance/travel/

The Foreign and Commonwealth Office gives up-to-date advice on travel to anywhere in the world, country by country. You are strongly advised to refer to this in any case; and particularly where advisory information applies. All travel plans to FCO advisory areas must be the subject of a risk assessment and will be referred to the Safety Office by the Head of Administration and Finance. To check if your travel plans might be affected by an FCO advisory please check the website: www.fco.gov.uk/en/travelling-and-living-overseas/

**Some key points:**

- Allow plenty of time (at least one month) before the start of your trip to do the planning and get any approvals
- The University has a duty of care to you wherever you are - when you are there
on what may be perceived as legitimate university business. Research would count as such. Even if your trip is taking you home to your own country (e.g. you are a Turkish national going to do fieldwork in Turkey), you will still need to demonstrate that you have considered the risks and completed a risk assessment.

Committees

Sociology Graduate Studies Committee

The members of the Sociology Graduate Studies Committee are:

- Prof Stephen Fisher - DGS (Trinity)
- Prof Federico Varese – TCD (Nuffield)
- Prof Leigh Payne (St Antony’s)

For 2017/18 the Chair will be Professor Stephen Fisher. The Graduate Studies Committee:

- Considers applications for admission,
- Appoints a University Supervisor for each student,
- Considers applications from students during the course of study (e.g. change of course; Transfer of Status; Confirmation of Status; Extensions of time etc.)
- Appoints examiners for MLitt and DPhil candidates
- Reviews the programme of teaching and considers changes in regulations etc.

The Committee meets twice a term (normally Tuesdays in weeks 2 and 7). It is important that students submit any applications (and all accompanying material) to the Committee (via the Graduate Studies Administrator by Friday of week 1 and Friday of week 6) in good time for its meetings. While some matters may be dealt with under Chair’s action during the vacations, this is not the norm and will not always be appropriate. Enquiries about the work of the Graduate Studies Committee should be made to the Graduate Studies Administrator.

Academic records of all students are maintained centrally on the University student database. Each new record is opened on the issue of a formal notice of admission. Further information is added to students’ records during their first term from matriculation forms and all records are continually updated as students progress on their course.

Graduate Joint Consultative Committee (GJCC)

The GJCC exists to provide a forum for graduate students to put forward suggestions, comments and grievances about the courses and facilities provided by the department. It will usually meet every term in Week 3. Membership includes student representatives (two for MSc, and one each for MPhil, PRS and DPhil), Head of Department, teaching staff, and the Graduate Studies Administrator. Secretarial support is provided by the GSA. All students are welcome to attend and are encouraged to put forward items for discussion through their representatives.
Supporting You

Problems, Advice

Students who have problems, academic, administrative or personal, and who are uncertain of the proper way to go about solving them have several possible courses of action open to them.

- Consult their Supervisor or the Graduate Studies Administrator in the first instance. The Taught Courses Director (Prof Federico Varese), the Director of Graduate Studies (Prof Stephen Fisher) or the Head of Department (Prof Melinda Mills) will if necessary consult the appropriate authorities on your behalf.
- The Director of Graduate Studies, Professor Stephen Fisher, is happy for students to drop in with brief questions when he is in the Department. For longer questions (i.e. requiring more than 15 minutes of time) an appointment must be booked. For issues about a particular course, please first talk to the course provider if appropriate.
- At your college, consult the Senior Tutor, the Tutor for Graduates or your own College Advisor, who will give similar help.
- Consult the elected graduate representatives in the Department who will give what help and advice they can.
- Consult the Graduate Studies Office in the University Offices or the Graduate Studies section of the University website, which will advise on the obtaining of necessary forms, submission of applications, dates and deadlines, deposit of theses, etc.
- Students who are not satisfied that the Department has addressed their concerns should consider making a formal complaint to the Head of Department, Professor Melinda Mills. There are also some issues which the Department cannot address, e.g. complaints relating to exams, and a formal complaint to the Proctors must be made in these circumstances. See below for more information.
- On a more personal level, the University Counselling Service at 11 Wellington Square (which acts in a strictly confidential way) is experienced not only in general psychological problems but also in the special problems and blocks associated with academic work. Nightline is a confidential listening and information service run for students by students and is open from 8pm until 8am from 0th to 9th week each term. Students can phone (2)70270 or visit Nightline at 16 Wellington Square.
- The Disability Lead for the Department is Prof Stephen Fisher. The Disability Coordinator is Kristiana Dahl.

Student Conduct

Students at Oxford are subject to two separate (but complementary) sets of disciplinary regulations: the rules and by-laws of your college provided in your college handbook, or equivalent document, and the University's conduct regulations.

The University regulations covering student conduct come from three main sources:

- University statutes, in particular Statute XI on University discipline;
- regulations, issued by: Council; the Proctors, as the University's disciplinary officers, including emergency regulations for student conduct, published in the University Gazette, notified to you by your college and remaining in force for a set period; the Rules Committee (six Congregation members and six student members who meet annually to review and issue conduct regulations); the Curators of the University Libraries; the IT Committee;
- rules on access and use, made and published by people or bodies responsible for managing University land and buildings, or operating University services and facilities.

The Examination Regulations cover a wide variety of important topics, you should read them carefully. Students who intentionally or recklessly breach regulations, or incite or conspire with others to do so, are liable to disciplinary action.
For more information please see the Student Conduct page of the University website: https://www.ox.ac.uk/students/academic/conduct?wssl=1.

Complaints

Making a Formal Complaint

- The Proctors investigate complaints, and are responsible for seeing that University examinations are properly and fairly conducted.
- All complaints must be directed to the Proctors (customarily the Senior Proctor) at the Proctors’ Office, University Offices, Wellington Square, Oxford OX1 2JD). Formal complaints sent to the Department or the Graduate Studies Office will be forwarded immediately to the Proctors.
- No complaint can be considered unless it is in writing. Only in exceptional circumstances will complaints be considered which do not come from either the candidate or the Supervisor. After a thesis has been submitted, the Proctors will not consider a complaint under this procedure dealing with allegations relating to inadequate supervision or other arrangements during the period of study.
- A complaint must relate to the outcome of the graduate degree in question. The complaint should identify the specific allegations relating to which remedy is sought. The Proctors will concern themselves principally with allegations relating to (i) procedural irregularities in the examination; (ii) circumstances affecting the student’s performance of which the examiners were not aware when their decision was taken; (iii) evidence of prejudice or of bias or of inadequate assessment. Candidates should note that complaints relating to the academic judgement of the examiners will not be considered.
- Notice of the receipt of a complaint will be sent to the chair of the Divisional Board concerned, the responsible officer of the candidate’s college, and the candidate’s Supervisor(s).
- A complaint must be lodged with the Proctors within twelve months of the date of the formal notification of the result of the examination from the Graduate Studies Office. Only in exceptional circumstances, for example where the Proctors are satisfied that new evidence has come to light since the expiry of the time limit, will a complaint be considered outside this limit.

Investigating a Complaint: the Candidate

- The candidate has the right to appear before the Proctors to state his or her case, and may be accompanied by a friend or adviser of his or her choice.
- A candidate does not have the right to see the examiners’ report. In the case of outright failure or the award of the relevant lower degree, the Proctors may ask the examiners for a statement on the thesis for transmission to the candidate.
- Candidates are reminded that direct communication with examiners during the course of a Proctorial investigation is not permitted.

Investigating a Complaint: the Proctors

- The Proctors may inspect any relevant material, including Divisional Board minutes relating to the receipt of the examiners’ report, and reports from the candidate’s Supervisor(s).
- The Proctors may consult the Supervisor, the examiners, the chair of the appropriate Divisional Board and anyone inside or, if necessary, outside the University whose views are considered relevant.
- The Proctors may call on a candidate to explain his or her case, and the candidate may be accompanied by a friend or adviser of his or her choice.

The Outcome of a Complaint

- At the conclusion of their investigation, the Proctors will decide, whether, on the facts of the case, the complaints should be upheld wholly or in part, or should be
rejected. The Proctors’ decision will be final.

- If satisfied that justice has not been done, the Proctors may recommend an appropriate course of action to the Divisional Board. They may, if necessary, seek a decree of the Hebdomadal Council to bring about the action which they recommend.

- The Proctors’ decision and any subsequent recommendation will be communicated to the candidate. This will be accompanied by a reasoned statement of their decision.

- The Chair of the Divisional Board, the appropriate officer of the college, the Supervisor(s), and, in some circumstances, the examiners will be informed of the outcome of the Proctors’ investigation.

- An annual report on the outcome of the investigation into complaints is given to the Educational Policy and Standards Committee in Hilary Term.

- The procedures followed reflect the general recommendations of the Code of Practice on Academic Appeals Procedure at Postgraduate Research Degree Level issued by the Committee of Vice-Chancellors and Principals in 1986.

### Harassment

The Department is committed to fostering an inclusive culture which promotes equality, values diversity and maintains a working, learning and social environment in which the rights and dignity of all students are respected. Harassment or victimisation is regarded as unacceptable behaviour and is not tolerated in any form. All members of the University are expected to treat each other fairly and with respect, courtesy and consideration.

Help and advice can be found in the Department by contacting your Supervisor, the DGS, the GSA or the Departmental Harassment Advisors (Professor Fisher and Maria Moreno, the Head of Administration).

You can also contact your college for support and advice.

For more information about where to go for help and advice, please see the Harassment webpage on the University site (https://www.ox.ac.uk/students/welfare/harassment?wssl=1). See also the University Policy and Procedure on Harassment (http://www.admin.ox.ac.uk/media/global/wwwadminoxacuk/localsites/equalityanddiversity/documents/harassment/Harassment_Policy_and_Procedure_MT14_Final.pdf).

### Whom to talk to about what

#### Academic Matters
Supervisor;
Graduate Studies Administrator – Kristiana Dahl (graduate-studies@sociology.ox.ac.uk; 286183);
Taught Course Director – Prof Federico Varese (federico.varese@sociology.ox.ac.uk; 281150); or
Director of Graduate Studies – Prof Stephen Fisher (stephen.fisher@sociology.ox.ac.uk; 286173)

#### Business of the Graduate Studies Committee
Graduate Studies Administrator (graduate-studies@sociology.ox.ac.uk; 286183)

#### Ethics Forms
Research Facilitator – Agnieszka Swiejkowska (DREC@sociology.ox.ac.uk, 286177)

#### Use of Departmental Facilities
Departmental Secretary – Jane Greig (jane.greig@sociology.ox.ac.uk; 281740)

#### Computing and IT
itsupport@manor-road.ox.ac.uk; 284840

#### Change of Supervisor (see page 29)
Supervisor;
Graduate Studies Administrator – Kristiana Dahl (graduate-studies@sociology.ox.ac.uk; 286183); or
Taught Course Director (federico.varese@sociology.ox.ac.uk; 281150); or
College Advisor

#### Confidential Advice Relating to Harassment
University’s confidential harassment number (2)70760
List of Abbreviations

CUREC and DREC – University and Department Research Ethics Committees respectively, these terms also used to refer to the Ethics assessment forms
DGS – Director of Graduate Studies
DPhil – Doctor of Philosophy
DTP – Doctoral Training Partnership. Oxford is part of the Grand Union DTP with Brunel and the Open University. It is funded by the ESRC and it is the means by which several of our doctoral students receive financial support. It is also facilities various training activities open to all Oxford students. ([http://www.granduniondtp.ac.uk/home](http://www.granduniondtp.ac.uk/home))
EPC – Education Policy Committee
ESRC – Economic and Social Research Council
GJCC – Graduate Joint Consultative Committee
Grey Book – The Exam Regulations (now not produced in hard copy, can only found online [http://www.admin.ox.ac.uk/examregs/](http://www.admin.ox.ac.uk/examregs/))
GSC – Graduate Studies Committee
GSS – Graduate Supervision System
NCRM – National Centre for Research Methods. Maintains a UK research training courses database and offers bursaries. ([https://www.ncrm.ac.uk/](https://www.ncrm.ac.uk/))
Proctors – The two Proctors (Senior and Junior) have responsibilities under the statutes and regulations for aspects of student discipline, for ensuring the proper conduct of examinations and for dealing with complaints.
PRS – Probationer Research Student
SSD – Social Sciences Division
TCD – Taught Courses Director
TNA – Training Needs Analysis

Online Glossary: [https://www.ox.ac.uk/about/organisation/history/oxford-glossary?wssl=1](https://www.ox.ac.uk/about/organisation/history/oxford-glossary?wssl=1)
“I think I chose to study sociology partly because I found economics too difficult, but also because I wanted to engage with the real world rather than just the make-believe world of the introductory economics that I studied at Cambridge.”

- Prof A Heath

“If sociology is to be anything more than interesting (and not always that interesting) speculation, it has to be empirical. That is, its theories and explanations must be based on sound observations of the real world.”

- Steve Bruce

*Sociology: a very short introduction*
